www.jp aerospace.com

JP Aerospace is an independent space program staffed by volunteers dedicated to bringing space travel to everyone. Founded in 1979, JPA has become a leading innovator in the exciting commercial space arena.

We offer a unique opportunity for you to put your name, logo and company in front of the world. JP Aerospace integrates space, sponsors and the media. We fly four to seven missions each year. These flights include rockets, balloons and airships. Each mission is accompanied by a series of press releases, interviews and media outreach campaigns. Our activities are followed extensively by print, web and TV media.

Our sponsors enjoy the benefits of dramatic images and video from our ever higher reaches to space, across the world good will from our education programs, and consistently positive, feel good, news coverage.

JP Aerospace has flown over a hundred missions without a serious injury or accident. We are the little guys, however, we shine like the pros.

What space means in the minds of customers:

High Performance
Achievement
Innovation
The Future

Transfer this image instantly to your brand or company. Reach technology minded decision makers. You are invited to be a part of branding at the edge of space by taking advantage of one of the sponsorship packages described within. If you need additional information please contact:
